

# CS 638: Version Control and Custom Plots

## Custom Plots

<https://stats.stackexchange.com/questions/81451/combining-box-plot-with-frequency-count?noredirect=1&lq=1>

### Creating Points and Lines:

- `ax.plot(x, y, 'ro')` # plot a red circle at point x,y
- `ax.plot((x1, x2), (y1, y2), 'k')` # black line from x1,y1 to x2,y2

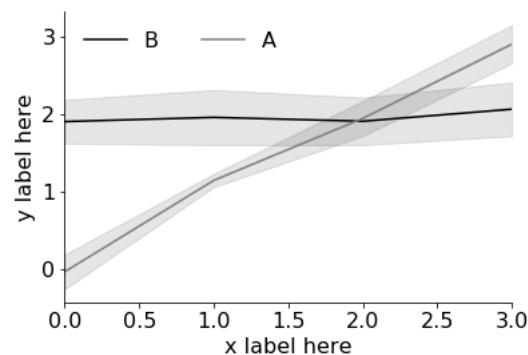

### Minimalist Plots:

- `ax.legend(frameon=False, ncol=2)`
- `ax.spines['right'].set_visible(False)`
- `ax.spines['top'].set_visible(False)`

## Representing Standard Deviation

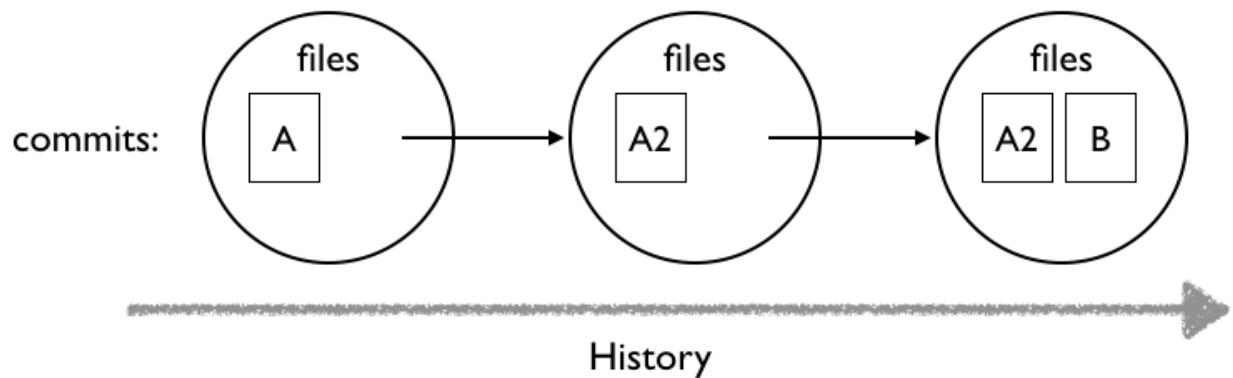

### Useful snippets:

- `df = df.set_index(["trial", "x"])`
- `df.mean(axis=0)`
- `mean = df.mean(level=1)`
- `std = df.std(level=1)`

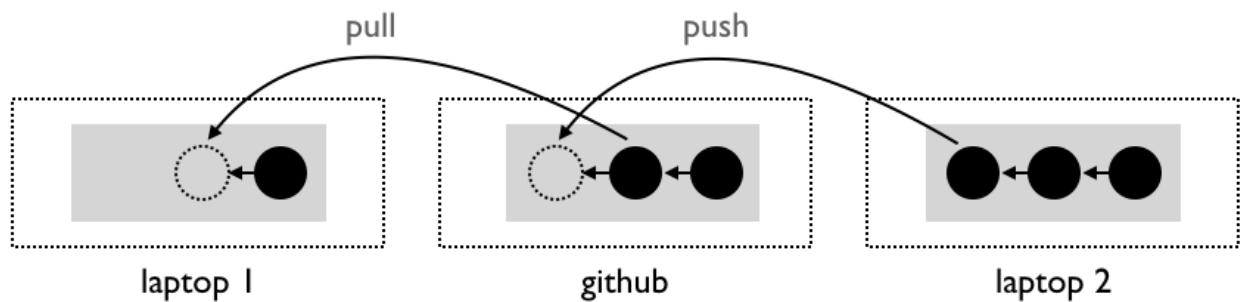

```
plt.fill_between(mean.index, mean[col]-std[col], mean[col]+std[col],
                 color='black', alpha=0.1)
```
